E) Information on how the price for Market Data was set

The BVB market data business policy comprises different types of products and services. It allows the market data consumers to access the specific information by type:

- of interest: real-time data, delayed data, end of day data.
- of usage, the redistribution of real time data being the most common services provided, through the registered specialized market data vendors.
- of the connection conveniences: real time data dissemination software application (data feed) and web-based applications provided by BVB. The access to the data feed is available via Internet over VPN or leased lines from BVB agreed suppliers, while web-based applications support apps developers to integrate the market data in their own products, by using a standard method. The web-based applications offer real time or delayed trading data and indices information for directly registered clients.

The price for the market data is based on the cost of producing and disseminating the market data, developing & maintaining the market data disseminating facilities and market data vending management & support. Main principles which govern the market data fees policy:

- covering the costs of producing and disseminating the market data business line,
- obtaining a reasonable margin (cost plus methodology).

Following type of costs are associated with market data dissemination: direct costs and joint costs.

- Direct costs are costs that can be specifically allocated to providing data vending services: Personnel costs, IT costs, other direct costs. Direct costs are incurred to run market data business line. These costs are allocated entirely to the market data business without sharing with other business lines;
- Joint costs are costs incurred in common production processes, and which cannot therefore be apportioned only to market data services. The joint costs are apportioned to the market data business based on the estimated market data sales value relative to the total revenues generated by the BVB.
