Current Report No. 4903

Date of report:	01.04.2026
Name of the issuing entity:	CONNECTIONS CONSULT S.A.
Registered office:	71 Buzesti Street, 7&8 floors, sector 1, Bucharest
Telephone/fax number:	0372 368 332/ 0372 006 765
Unique registration code:	RO 17753763
Serial number in the Trade Register:	J2005011864405
Subscribed and paid-up share capital:	1,308,199.90 lei
The market on which the issued securities are traded:	SMT - AeRO category, CC piata symbol

Current report prepared in accordance with Law no. 24/2017 on issuers of financial instruments and market operations, ASF Regulation no. 5/2018 on issuers of financial instruments and market operations and/or the Bucharest Stock Exchange Code for the Multilateral Trading System.

Important events to report:

In accordance with the provisions of Article 234(1)(i) of ASF Regulation no. 5/2018 on issuers of financial instruments and market operations and Law no. 24/2017 on issuers of financial instruments and market operations

Connections Consult S.A. announces the conclusion of a significant contract with a public institution in Romania, having as object the supply and implementation of an Artificial Intelligence and High Performance Computing (AI & HPC) platform. The total amount of services delivered by Connections Consult S.A. is 45,896,589 lei plus VAT.

The project aims to develop a data room dedicated to training and operating Artificial Intelligence models. The platform is built around a cluster of state-of-the-art GPU accelerators – the essential component of modern AI infrastructures – and is designed to support significant volumes of data and computationally intensive workloads specific to AI and machine learning applications.

A distinctive element of the solution is the cloud-native architecture. This approach provides the beneficiary with a complete private cloud, with compute, storage and network resource orchestration capabilities comparable to those of large public cloud providers, but with total control over data and infrastructure. The platform enables the running of distributed AI workloads, dynamic GPU resource management, and native integration with the AI and data science tool ecosystem.

Connections Consult S.A. delivers the fully integrated end-to-end solution: design of the AI & cloud architecture, implementation of the cloud platform, complete configuration of the GPU cluster and large-scale storage infrastructure, up to the training of the beneficiary's technical teams and ensuring the warranty and extended technical support throughout the support period offered.

Positions Connections Consult in the AI Infrastructure & Cloud segment

This contract strengthens Connections Consult S.A.'s position as a reference provider of AI infrastructure and private cloud solutions for the public sector in Romania, demonstrating the company's ability to execute projects of high technical complexity at the intersection of HPC, Artificial Intelligence and cloud technologies.

Through its value and technical complexity, the contract represents the largest contract for the supply of HPC infrastructure with GPU accelerators in the public sector in Romania - a reference project on the local market, in a field that is booming globally. Massive investments in AI infrastructure are a strategic priority both at European and national level.

Connections Consult is thus positioned as one of the few players in Romania with proven experience in delivering AI platforms and private cloud on an institutional scale, a relevant competitive advantage as the Romanian public sector accelerates the adoption of AI technologies in the coming years.

Bogdan-Liviu Florea
Chairman of the Board of Directors
