CHRD – Performance and Key Events in 2026

1. Business performance

Following Q1 losses, which management attributes to the impact of Ordinance No. 53/2025 on organic pesticide production, CHRD diversified its offering, attracted new customers and returned to profitability. Since August, staffing at the Filiași plant has doubled and expansion of production and logistics facilities has begun.

September: sales of RON 873,775 and profit of RON 174,633. October: sales of RON 948,936 (after the reporting period). Orders for late 2026 and 2027 are increasing; the target is to exceed RON 1 million in monthly sales and achieve a net margin above 20%.

2. Share buyback programme

In October, a buyback programme covering 20% of the shares was approved, excluding the majority shareholder, at a maximum of RON 20 per share, with the aim of cancelling the shares and reducing share capital. Documentation for the first public purchase offer is being prepared for the FSA; further transactions are envisaged for 2027.

3. Liabilities and receivables as of 30.09.2026

CHRD has no bank debt. Of total liabilities of approximately RON 5.6 million, around RON 3.75 million represents advances and loans from active customers relating to ongoing orders, to be settled through offsets and deliveries.
