The Fund's net assets rose by 0.6% in November. The main positive contribution came from the TTS shares, which rose by 14%. By the same percentage (14%) rose also the DN Agrar shares, but their impact was mitigated due to the lower weighting.

AROBS shares fell by 4.2% against the decrease in profit, mainly due to the cost of amortization of the acquired companies. On the other hand, they contributed to the increase in turnover by 70%, so that, in the future, we expect the positive impact to be seen in the profit.

2. Tradeable portfolio

The tradeable portfolio rose by approx. 1% in November, while the *Cash* position was reduced from RON 23 to 22 mln. mainly as a consequence of partially re-building the position held on AROBS, as a result of the fall in price compared with the moment of sale, as well as a result of increasing the holding of Electrica shares.
