Subscribed and paid share capital	EUR 125,001.25
Total number of shares	125,001,250
Symbol	PE
Market where securities are traded	Bucharest Stock Exchange, Main Segment, Int'l Category

Important events to be reported: Transaction for the acquisition of a 200 MW (power input/output) / 400 MWh (capacity) ready-to-build battery storage system development in Romania

The management of Premier Energy PLC (the "Company") informs the market that on 20 November 2025 the Company acquired a 100% stake in a 200 MW (power input/output) / 400 MWh (capacity) ready-to-build Battery Energy Storage System (BESS) development located near Iași, Romania. The Company plans to construct the project primarily during 2026, with commissioning expected in late 2026 / early 2027.

Once operational, the facility will be one of the largest battery storage plants in the SEE region. It is designed to capture the significant intraday price volatility and high balancing costs that characterize electricity markets across the region and particularly in Romania. The project will also act as a natural hedge to the Group's renewable electricity production and supply activities, further strengthening the Group's strategy of diversification and vertical integration across the electricity value chain.

The total development and construction cost of the project is estimated at approximately EUR 75 million. The Company's management is currently working on securing financing for the project with a major CEE financial institution.
