Event to be reported: own shares buy-backs transactions

Important Event to Report: Statement Regarding the Incident at the Râmnicu Vâlcea Industrial Site

Statement from Chimcomplex SA Borzești

Today, Friday, November 13, at 7:49 AM, an incident occurred at the Râmnicu Vâlcea industrial site, triggered by the accidental shutdown of a chlorine compressor. This set off a chain reaction, causing the shutdown of downstream units. The only secondary effect was a disruption in the technological process during the neutralization phase, which resulted in the accidental release of a small quantity of chlorine—approximately 15.5 kg—into the atmosphere.

At 8:00 AM, the Emergency Situations Committee was activated. Opting for a higher level of caution than what is strictly required by procedure for minor incidents—such as this one—the Committee initiated a "yellow code" response (rather than "red"). This decision was made due to foggy weather conditions, which hindered the rapid dispersion of the vapors into the upper layers of the atmosphere. All procedures for the controlled shutdown of the facilities were carried out successfully, and first aid was immediately provided to all employees present on-site during that shift.

At 8:05 AM, ambulance and fire services were alerted; they arrived on-site at 8:20 AM. Simultaneously, rapid response teams oversaw the evacuation of all employees on the premises and fully secured the site by 8:35 AM, in accordance with standard operating procedures.

Five employees reported respiratory issues (irritation and coughing) and were transported to the hospital. They were diagnosed with mild exposure; all remained conscious and are out of any danger. Although classified as a minor incident, the executive alerted all support departments in the county—including the Mihăilești town hall, which has specific responsibilities in such cases—and their cooperation was professional.

CHAIRMAN of the BoD,
av. dr.ec. Ștefan Vuza
