Trade Market	Bucharest Stock Exchange, Main Segment, Standard Category

Important events to be reported: Q3 2026 Report

Green Tech International S.A. (hereinafter referred to as the "Company" or the "Group") informs the market about the publication of the financial report for the third quarter of 2026.

Horia Pitulea, CEO Green Tech International:

"During the first nine months of 2026, Green Tech International continued its operational activities and made progress in implementing its development strategy, focused on harnessing the potential of geothermal energy in Romania. Our priorities were focused on consolidating existing operations, advancing investment projects, and identifying new opportunities for the use of geothermal resources, with the aim of building a diversified and sustainable business model over the long term.

Operational activities were carried out in the Călimănești-Căciulata perimeter, where geothermal water is used for heating systems and recreational facilities, and in western Romania, in Nădlac, where it provides heating and domestic hot water, while the Group's strategic projects continued to advance. Revenue from the sale of services increased by 41%, reaching RON 9 million, reflecting the growth of our core business. Total operating revenue remained at a level similar to that recorded in the first nine months of 2025, at approximately RON 9 million, while operating profit amounted to RON 1.35 million. Net profit stood at approximately RON 0.9 million, compared to RON 2 million in the first nine months of 2025, with the difference mainly attributable to lower financial income and increased foreign exchange losses.

As of September 30, 2026, Green Tech International's total assets amounted to RON 821 million, while equity stood at RON 684 million.

Regarding our strategic projects, we are focusing on the development of greenhouse complexes in Ciocaia, Lovrin, and Tomnatic, covering a total land area of approximately 60 hectares, which will use geothermal energy for heating. These investments aim to develop local vegetable production and increase the share of the domestic market supplied from Romanian sources, contributing to reducing dependence on imports. We are also continuing our efforts to harness geothermal energy for district heating systems in the Bucharest area.

During the first nine months of 2026, a significant milestone for the Company was the favorable outcome of the arbitration proceedings initiated against GEM Global Yield LLC SCS and GEM Yield Bahamas Limited. The arbitral tribunal in New York found that GEM Global Yield LLC SCS had breached its contractual obligations and ordered it to pay the Company approximately EUR 35 million in exchange for 12,363,768 ordinary shares, plus annual interest of 8% and the costs associated with the arbitration proceedings. This decision represents a significant achievement in our efforts to safeguard the interests of the Company and its shareholders. We will take all necessary steps to secure the full recovery of the amounts awarded under the arbitral award.

For the remainder of the year, our priorities remain focused on advancing investment projects, improving operational efficiency, and identifying the most suitable financing solutions to support our development plans. Our objective is to transform geothermal resources into economically viable projects that contribute to revenue diversification and long-term value creation for shareholders."

The interested parties can consult the report on the Company's official website, www.green-tech.energy, in the "Investor Relations" section, or by accessing directly the following link: https://green-tech.energy/reports/#reports.

The company is organizing on **November 25, 2026, starting 5:00 PM** (Romanian time), the videoconference for the presentation of the third quarter of 2026.
