Event to report:

Change of stock symbol – strategic step in consolidating the identity of MF CAPITAL S.A.

MF Capital S.A. informs investors, shareholders and the general public that, starting with February 23, 2026, the stock symbol under which the company's shares are traded on the main regulated market administered by the Bucharest Stock Exchange SA will be changed from MECE to MFC.

The change of stock symbol marks an important stage in the strategic transformation and rebranding process of the issuer, reflecting the alignment of the market identity with the new name MF Capital S.A. and with the development directions oriented towards real estate investments, agriculture and sustainable energy projects.

By adopting the stock symbol MFC, the company aims to consolidate its positioning on the capital market, increase visibility among institutional and international investors, as well as support a more coherent and modern communication with the financial community.

The change of the stock symbol:

- does not affect the company's share capital;
- does not modify the rights of shareholders;
- does not imply a change in the ISIN code of the shares;
- does not require any action from investors or intermediaries.

The company's shares will continue to be traded on the regulated market administered by the Bucharest Stock Exchange under the same conditions, the new stock symbol MFC being used starting from the aforementioned date.

MF Capital S.A. management considers this change a strategic step in consolidating the company's image and in supporting the objective of creating long-term value for shareholders by modernizing assets and developing projects with sustainable economic impact.
