Important events to be reported: Commencement of LNG procurement and securing of commodity-based financing facility

The management of Premier Energy PLC (hereinafter referred to as the "Company") informs the market that the Company has commenced the procurement of liquefied natural gas ("LNG") through the LNG terminal in Alexandroupolis, Greece.

The Company committed to procure an LNG cargo shipment of 1 million MWh (or approximately 100 million cubic meters) of natural gas for the upcoming gas year (1 October 2026 – 30 September 2027) through its reserved capacity at the Alexandroupolis LNG terminal in Greece which enables the Company to receive natural gas from the terminal on a daily basis throughout the gas year, enhancing the flexibility and diversification of its natural gas sourcing strategy across the Central and Southeastern European region.

In connection with the LNG procurement, the Company has entered into a Trade and Commodities Finance Facility with Natixis, which includes:

- an up to EUR 53 million letter of guarantee supporting the Company's obligations towards the LNG terminal; and
- up to EUR 45 million financing for the purchase of the LNG cargo shipment, scheduled for April 2027.

The Alexandroupolis LNG terminal, located in northern Greece, provides access to cross-border interconnections, allowing natural gas flows towards Bulgaria, Romania, Moldova and Hungary. The Company secured capacity at the terminal in 2020, ahead of the European energy crisis, as part of its strategy to diversify its natural gas sourcing and strengthen its supply flexibility across the region.

The commencement of LNG procurement further strengthens the Company's position as a reliable natural gas supplier and supports its ability to respond to the evolving energy needs of its customers across the markets in which it operates.
