Market where securities are traded	**Bucharest Stock Exchange, Main Segment, Standard Category**

Important events to be reported: Participation in the European CYBER-IN-A-BOX project

The management of Safetech Innovations S.A. (hereinafter referred to as the "Company") informs the market of its participation in the project "An AI-Assisted Compliance, Monitoring and Training Toolkit for European SMEs" (CYBER-IN-A-BOX), implemented under the DIGITAL-ECCC-2025-DEPLOY-CYBER-09 call – Deploying Strategic Cyber Capabilities Across Europe.

The project is an SME Support Action, with the European Cybersecurity Industrial, Technology and Research Competence Centre serving as the granting authority. It has a duration of 36 months, and its international consortium comprises 11 partners.

The amount allocated to the Company for its participation in the project is EUR 507,180, of which EUR 380,385 is non-reimbursable funding.

CYBER-IN-A-BOX aims to develop an AI-powered cybersecurity toolkit delivered as a service for small and medium-sized enterprises. It will help organizations strengthen their cybersecurity and prepare for the requirements of frameworks and regulations such as the Cyber Resilience Act (CRA), NIS2, ISO/IEC 27001 and PCI DSS, without requiring extensive in-house cybersecurity expertise.

The project addresses challenges commonly faced by SMEs: limited visibility over their IT/OT assets and software components, a lack of continuous technical assurance, difficulties in gathering evidence for compliance and audits, and limited capacity to translate complex requirements into practical measures.

Victor GANSAC
Chairman of the Board of Directors
