

## OMV Petrom starts a photovoltaic project at Petrobrazi refinery

- ▶ A ~7 MW photovoltaic park will be developed within the refinery for internal power consumption
- ▶ The project will support the refinery decarbonization initiatives, including green hydrogen production for the future SAF/HVO unit
- ▶ The project is co-financed through the Modernisation Fund

OMV Petrom, the largest integrated energy producer in South-Eastern Europe, will build a photovoltaic park at the Petrobrazi refinery. With an installed capacity of around 7 MW, the park will supply renewable power for the refinery's own consumption.

"Adding photovoltaic capacity at the refinery enables us to meet part of our power demand through renewable energy. It is a consistent gradual progress that supports both operational performance and our environmental objectives", said **Franck Neel, Member of the OMV Petrom Executive Board responsible for Gas and Power.**

The photovoltaic park will cover ~110,000 square meters within the refinery.

The project includes the acquisition of equipment and materials, as well as construction and installation works required to integrate the facility into the refinery's electrical infrastructure, including connection to the internal grid. The project has a budget of up to RON 45.4 million, including VAT, of which RON 8.4 million is provided through the Modernisation Fund.

The Procurement, Construction and Commissioning contract has been awarded, with construction works expected to start shortly and be completed this year. The park will be operated by OMV Petrom.

This investment adds to OMV Petrom's ongoing construction of the new sustainable fuels (SAF/HVO) unit at Petrobrazi, which will include two hydrogen units designed to produce green hydrogen using renewable power.

### About OMV Petrom

OMV Petrom is the largest integrated energy producer in Southeastern Europe, with an annual Group hydrocarbon production of approximately 38 million boe in 2025. The Group has a refining capacity of 4.5 million tons annually and operates an 860 MW high-efficiency gas-fired power plant. The Group is present on the oil products retail market in Romania and neighbouring countries through approximately 780 filling stations under two brands – OMV and Petrom.

OMV Petrom is listed on the Bucharest Stock Exchange, with a 28.1% free float. As of end-2025, Romanian shareholders held around 45% of the shares (of which the Romanian state held 20.7%, and 24.4% were owned by pension funds in Romania, as well as other Romanian natural persons and legal entities). OMV Aktiengesellschaft held a 51.2% stake in OMV Petrom, and the remaining 3.7% were held by other foreign investors.

OMV Petrom is one of the largest contributors to the state budget, with more than 48 billion euro in taxes and dividends paid between 2005 and 2025. During the same period, the company invested over 21 billion euro and allocated around 210 million euro to develop communities in Romania, focusing on environmental protection, education, health, and local development.

Our commitment to climate change mitigation is reflected by our consistent efforts to reduce our emissions, with the long-term goal to achieve net zero operations by 2050.
