OMV Petrom invested ~ EUR 115 million in modernizing Petrobrazi's electrical infrastructure

- **The new infrastructure will support both the refinery's operations and the activities of future SAF/HVO and green hydrogen production units**

OMV Petrom, the largest integrated energy producer in South-Eastern Europe, invested approximately EUR 115 million to modernize the electrical infrastructure of the Petrobrazi refinery. The investment is part of Petrobrazi refinery's broader modernization and transformation program.

"A modern electrical infrastructure is essential for the proper operation of a refinery. Through this investment, we are strengthening Petrobrazi's electrical infrastructure to support both the refinery's current operations and the new capacities under development, including SAF and HVO production as well as the green hydrogen projects. This is an important step in Petrobrazi's transformation to meet the energy requirements of the future," **said Radu Căprău, member of the OMV Petrom Executive Board responsible for Refining and Marketing**.

The project included the construction of a high-voltage power line directly connected to the Transelectrica substation, of a new-generation electrical substation, as well as a power distribution substation.

The new power infrastructure uses Blue GIS technology, a modern electrical switching system with a low environmental impact.

The refinery operates its own power generation unit, which currently supplies nearly all of its electricity needs.

A 7 MW photovoltaic energy project is also under construction at Petrobrazi.

The new electrical infrastructure creates the necessary conditions for integrating major projects currently under implementation, such as the production unit for sustainable aviation fuel (SAF) and renewable diesel (HVO), as well as green hydrogen production capacities.

Petrobrazi refinery plays an important role in supplying the Romanian market with fuels and other petroleum products.

About OMV Petrom

OMV Petrom is the largest integrated energy producer in Southeastern Europe, with an annual Group hydrocarbon production of approximately 38 million boe in 2025. The Group has a refining capacity of 4.5 million tons annually and operates an 860 MW high-efficiency gas-fired power plant. The Group is present on the oil products retail market in Romania and neighbouring countries through approximately 780 filling stations under two brands – OMV and Petrom.

OMV Petrom is listed on the Bucharest Stock Exchange, with a 28.1% free float. As of end-2025, Romanian shareholders held around 45% of the shares (of which the Romanian state held 20.7%, and 24.4% were owned by pension funds in Romania, as well as other Romanian natural persons and legal entities). OMV Aktiengesellschaft held a 51.2% stake in OMV Petrom, and the remaining 3.7% were held by other foreign investors.

OMV Petrom is one of the largest contributors to the state budget, with more than 48 billion euro in taxes and dividends paid between 2005 and 2025. During the same period, the company invested over 21 billion euro and allocated around 210 million euro to develop communities in Romania, focusing on environmental protection, education, health, and local development.
